

## Colad Disposable Nitrile Gloves Black 60 gloves

Stronger, thicker and more durable than conventional nitrile gloves for use during the painting process. Not just any glove is suitable for use in the painting process. When working with paints, protection of the painter is of the utmost importance. Besides providing protection for the user, it's also vital that gloves protect the paint from contamination. Paint is, together with labour, the most expensive component in a paint processing company. Colad nitrile gloves prevent hairs, skin fibres and skin grease from coming into contact with the paint and protect the user against chemical splashes

### Benefits of Nitrile Gloves Black:

- Especially suitable for working with paints and solvents
- Natural latex free: Our gloves are natural latex-free. Absolutely safe to wear for people with a latex allergy
- Silicone free: Our gloves are designed to be silicon free. This prevents contamination of the paint
- Powder free: Our gloves are washed 3 times during production. This makes them 100% powder free to prevent paint contamination
- Single use: Our gloves marked with the 'single use' logo are designed to be disposed after use. This prevents contamination and guarantees clean working

## Packaging information

Dispenser box with 60 gloves

## Technical information

- Thickness: 6 mil (0.15 mm)
- Long sleeve: Length 285 mm
- Better grip: Textured fingertips
- Color: Black
- Available sizes: M, L, XL and XXL
- Notified body number: CE 2777
- Ongoing conformity: CE 2777

536004	XL	8714247030110
536006	XXL	8714247042663

## Frequently Asked Questions

### > What gloves do I use for what process?

Colad offers a complete range of gloves, suitable for all steps in the paint process. We categorize three types of gloves for different steps in the paint process:

1. Preparation: For disassembly, assembly and preparation we provide you with the Colad Polyester Preparation Gloves. Colad Preparation Gloves offers protection against mechanical risks. The EN 388:2016+A1:2018 test indicates the abrasion, blade cut, tear and puncture resistance.
2. Painting: Colad disposable nitrile gloves are especially developed for use during the paint process, offering comfort and protection for the user and protection against paint contamination.
3. Cleaning: For cleaning with various chemicals, Colad advises to use their Industrial Nitrile or Neoprene gloves. These gloves are fitted with a soft, anti-allergic liner that prevents allergies and strengthens the gloves. Both Colad gloves are tested according to EN ISO 374-1:2016+A1:2018/Type A (chemical resistance), EN ISO 374-4:2019 (degradation) and EN ISO 374-5:2016 (bacteria and virus) which means they are leak-proof, protect against mechanical risks and chemical dipping (full contact).

### > Why should I use nitrile gloves?

Not just any glove is suitable for use in the painting process. When working with paints, protection of the painter is of the utmost importance. Besides providing protection for the user, it's also vital that gloves protect the paint from contamination. Paint is, together with labour, the most expensive component in a paint processing company. Colad nitrile gloves prevent hairs, skin fibres and skin grease from coming into contact with the paint and protect the user against chemical splashes

### > Do you have other nitrile gloves?

Yes, we offer Nitrile Gloves Grey - art.no. 53820x, Nitrile Gloves Blue - art.no. 53090x
